

Ankle and Foot Evidence-Based Forum: Clinical Management of Lateral Ankle Sprains
Wednesday, June 23, 12:15 pm – 1:15 pm

All clinicians and researchers are invited and encouraged to attend this interactive discussion that integrates the clinic and science. By attending this forum, attendees will learn and discuss current literature and clinical applications regarding the *clinical management of lateral ankle sprains*. After a brief presentation on emerging clinical techniques related to ankle sprains, a panel will lead an open discussion on this topic.

Education Evidence-Based Forum: The Challenge of Bringing Evidence-Based Principles and Practices into the Classroom

Thursday, June 24, 8:15 am – 9:15 am

All clinicians and researchers are invited and encouraged to attend this interactive discussion that integrates the clinic and science. By attending this forum, attendees will learn and discuss current literature and practical applications regarding *the challenge of bringing evidence-based principles and practices into the classroom*. After a brief presentation on these challenges and suggestions on how to approach them, a panel will lead an open discussion on this topic.

Heat and Hydration Evidence-Based Forum: Dispelling Dehydration Myths

Thursday, June 24, 8:15 am – 9:15 am

All clinicians and researchers are invited and encouraged to attend this interactive discussion that integrates the clinic and science. By attending this forum, attendees will learn and discuss current literature and clinical applications regarding *dehydration and the myths surrounding it*. After a brief presentation on the common myths and an overview of how science addresses these myths, a panel will lead an open discussion on the topic.

Knee Evidence-Based Forum: Osteoarthritis and its Relationship to ACL Injury

Wednesday, June 23, 9:30 am – 10:30 am

All clinicians and researchers are invited and encouraged to attend this interactive discussion that integrates the clinic and science. By attending this forum, attendees will learn and discuss current literature and clinical applications regarding *osteoarthritis and its relationship to anterior cruciate ligament injury*. After a brief presentation highlighting this relationship and offering clinical and science related next steps, a panel will lead an open discussion on this topic.

Head and Spine Evidence-Based Forum: Helmet Removal & Head/Spine Implications

Wednesday, June 23, 10:45 am – 11:45 am

All clinicians and researchers are invited and encouraged to attend this interactive discussion that integrates the clinic and science. The purpose of this session is to highlight current literature and clinical applications regarding *helmet removal and its implications on head and spine injury*. After a brief presentation of the most recent research and clinical findings on this topic, a panel will lead an open discussion on this topic.

Modalities Evidence-Based Forum: Is There More to Acute Musculoskeletal Injury Management than We Think?

Friday, June 25, 10:00 am – 11:00 am

All clinicians and researchers are invited and encouraged to attend this interactive discussion that integrates the clinic and science. By attending this forum, attendees will learn and discuss current literature and clinical applications regarding the *management of acute musculoskeletal injury*. After a brief presentation on what we know and have yet to learn regarding acute injury management, a panel will lead an open discussion on this topic.

Shoulder Evidence-Based Forum: The Effects of Shoulder Alterations on Elbow Function
Wednesday, June 23, 8:15 am – 9:15 am

All clinicians and researchers are invited and encouraged to attend this interactive discussion that integrates the clinic and science. By attending this forum, attendees will learn and discuss current literature and clinical applications regarding *the effects of shoulder alterations on elbow function*. After a brief overview on how shoulder dysfunction influences the elbow, a panel will lead an open discussion on this topic.
