Hey, man. Get that turn burn covered. I don't want to catch the 'rona.
Dude, you know that's not how it's spread, right?
But, don't all Asians have it in their DNA or something?
What seems to be the problem here?
I don't want to catch this Asian virus thing from his turf burn.
First, he's your teammate, not your enemy. Plus, COVID-19 is spread through respiratory droplets, not blood.
Yeah, man.
Oh...sorry, dude. I guess I just didn't understand it very well. Are we still cool?
The virus doesn't care about race, gender, or age, and neither should you.
Yeah, we're cool. Just try to educate yourself before sounding like a jerk, ok?
