

As an athletic training student aide, what can I do if I see discrimination happening among the athletes?

Great question! It's important for us to be educated, act, and inform. Let's look at an example.

Hey bro, you should go back to your country so you don't get the rest of us sick.

Dude, I'm American. Plus I know that washing my hands is just as effective as whatever you've got going on there.

It's because of people like you that I have to wear this gear to protect myself.

Woah! That disrespect is not the kind of dialogue we allow from our athletes! COVID-19 doesn't target or come from specific races.

Things like washing hands and covering a cough or sneeze can reduce everyone's risk of getting sick. Race and ethnicity doesn't play a role, but respecting each other is what makes a team.
