Meet Your 2014 NATA Presidential Candidates

By Sanette Ludick

NATA is pleased to introduce your 2014 presidential candidates: Russ Richardson, EdD, ATC, and Scott Sailor, EdD, ATC. Make plans to attend Face Time '14 at 9:15 a.m. Friday, June 27 in ICC 104 to hear both candidates present their campaign platforms and answer questions from the audience.

Russell J. Richardson, EdD, ATC

Job Title/Employer: Athletic trainer and associate professor, University of Montana-Western
NATA member since: 1979

If elected president, Richardson plans to focus on raising athletic training’s profile within the health care arena. He said the profession has grown tremendously in the past five years but still lacks a clear road-map for moving forward. “I would advocate for a new strategic planning process to reinforce our current direction as well as clearly direct us for our future. Like most roadmaps, directions change and modify frequently,” Richardson said. “Our association needs to be mobile, agile and nimble enough to ensure our safe arrival at our final destination.”

Scott R. Sailor, EdD, ATC

Job Title/Employer: Chair of the department of kinesiology and director of the AT program at Fresno State University
NATA member since: 1985

Sailor’s presidential platform can be summed up in three words: access, awareness and allies. Sailor would like to see improved access to athletic trainers in secondary schools and youth sports organizations. Sailor points out that many schools throughout the country lack adequate staffing of athletic trainers, so those ATs are often required to scale back the services they provide in order to meet the overwhelming demand. He plans to work toward making athletic trainers more accessible to the general population, especially adults who need help returning to their active lives after an injury.
JOHNSON & JOHNSON is proud to be an official sponsor of the 2014 FIFA World Cup™ Brazil.

JOHNSON & JOHNSON athletic tapes provide superior unwind tension roll after roll, to give you maximum use and performance, right down to the core. The custom fit and support provides your athletes with the best possible protection against injury. And, as a founding strategic partner of the National Athletic Trainers’ Association, Johnson & Johnson continues to deliver outstanding support to you, your association and your profession.
News in Brief

PBATS Stays Busy in Indy

Despite the fact that the professional baseball season is in full swing, several members of the Professional Baseball Athletic Trainers’ Society have made the trip to Indianapolis to take part in a full slate of programming.

PBATS is hosting its educational session “Musculoskeletal Screening for Professional Baseball Pitchers” from 4-6 p.m. today in ICC 500 Ballroom. Several PBATS members are making a concentrated effort to reach out to students and young professionals during #NATA2014. Representatives will be on hand to speak to VPs at the NATA Young Professionals’ Committee Social today (6:7-30 p.m. in the Cramer Young Professionals’ Lounge—ICC 201), and they will speak to student groups hosted by the National Athletic Training Student Committee and the Ethnic Diversity Advisory Committee on Friday, June 27. Make plans to stop by one of these events if you would like to connect with PBATS members.

Do Your Part; Fill Out Your Postcard

Turn to page 119 in your Convention Guide (inside your registration bag) to find two legislative postcards. Fill out your information on the back of each card and put the cards in the collection boxes located throughout the convention center and inside the NATA Connect area of the AT Expo. This simple act will help support athletic training legislation! Never underestimate the power of grassroots effort.

MY FIRST CONVENTION: Q&A WITH KENT FALB

By Sanette Ludick

Former NATA President Kent Falb, ATC, prefers phone calls to email. “It’s more personable,” he chuckled. He told me about the very first time he sent an email: He used All Caps, which he didn’t know indicates yelling in email etiquette. Apparently the response was less than pleasant, and Falb decided phone conversations were a better option. I gave him a call before our 2014 convention to discuss his latest honor and find out how the convention has changed since the 1960s.

Falb, already a member of the NATA Hall of Fame, is receiving another special honor in Indianapolis. He is the first recipient of the 2014 Eve Becker-Doyle Leadership Award. Falb has fond memories of working with former NATA Executive Director Eve Becker-Doyle. “To have been on the Board of Directors when we elected Eve as our new executive director, and having had the opportunity to jointly work with Eve for four years, was indeed an honor and a privilege,” Falb said. NATA’s highest leadership achievement, the Eve Becker-Doyle Leadership Award requires 40 years of NATA membership and a strong commitment to volunteerism.

Falb has long been dedicated to the AT profession and NATA. He has always made it a point to attend the association’s annual conventions, and #NATA2014 will mark his 48th NATA convention!

Falb: I attended my first association meeting in 1963 in Cincinnati. I have not missed a convention since 1967.

NATA: When did you attend your first NATA meeting?

NATA: What was the first meeting like? How was it different from current conventions?

Falb: In 1963 there were a grand total of 400 people, and that included association members, family members and 10 vendors. Today the number of vendors has significantly increased. Back then, there were no students who attended the conference; and even though the featured topic was relevant and interesting, discussions were entirely based on experience and opinion – not on science. If you were to take an attendee from 1968 to this year’s convention they would probably say [our first conventions were] not very high level or not very informative, but based on our knowledge at that time, it was very timely. It goes to show the sophistication of the profession and how innovative and enhanced education has become over time. However, in the 51 years since attending my first convention there has always been one constant: an opportunity to renew acquaintances and friendships, an opportunity to network.

NATA: Do you have any advice for newcomers to this year’s conventions, particularly students who may be attending their first meeting?

NATA: Which convention was your favorite and why?

NATA: Now that you are retired, what is your focus at the convention?

NATA: What do you most look forward to at the convention?

NATA: What were the high points of your AT career?

NATA: What is your primary focus these days?

Falb: Conventions are critical to all students today! Students must be encouraged to take advantage of the opportunity to network.

Falb: That’s an unfair question! All the conventions have been special and unique in some way.

Falb: Being retired allows me to go to meetings and renew the old friendships I have been developing over the years. This is my primary focus these days.

Falb: One of the things I look forward to most is the opportunity to meet as many students as possible. I consider them the future of our profession. If in some small way I can influence and motivate them to have a successful career, then I’ve fulfilled an obligation as a leader and a role model.

Falb: There isn’t enough space to answer this question. Four high points stand out: To have been employed by the NFL for more than three decades, to have been elected for two terms to serve as the NATA’s president, to have been elected to the NATA Hall of Fame, and last but not least, to be the first recipient of the Eve Becker-Doyle award.

Falb: Students must be encouraged to take an attendee from 1968 to this year’s convention they would probably say [our first conventions were] not very high level or not very informative, but based on our knowledge at that time, it was very timely. GATORADE EDUCATIONAL SESSION FEATURES ALABAMA ATs

An efficient sports performance team is critical in today’s fast-paced athletic environment and can significantly impact an athletic department’s success. Teamwork is essential to creating that efficient process, and the collaboration among the athletic training, nutrition and strength and conditioning staffs at the University of Alabama serves as an example of how a first-class sports performance team operates. By utilizing each of their skill sets, the staff members work in unison to bring a wealth of knowledge and experience to better serve their athletes. This collaboration has resulted in an increasingly efficient sports performance system that helps power one of the nation’s premier athletic departments.

Gatorade is hosting an education session titled, “The Sports Performance Team: Integrating all Disciplines to Maximize Injury Treatment and Promote Optimal Performance,” this morning from 8:15 to 10:15 a.m. in ICC 109.

Jennifer Schmit, director of influencer partnerships and education at Gatorade, talks about the brand’s influencer partnerships and education programs. Why is it important for Gatorade to reach out to athletic trainers? Athletic trainers understand athletes’ health and safety needs on and off the field. This is important to Gatorade because we are constantly striving to provide innovative fueling and hydration solutions and services for more athletes across more occasions. The insights athletic trainers provide are key drivers in the innovation process, especially as we expand beyond our GSSI researchers and the NATA to develop a shortlist of hot topics in the athletic training field. We then run these ideas by a small group of athletic trainers to see what resonates and what session topics they would be most likely to attend. Based on these insights, we make a final decision and begin securing top-tier speakers to bring the topic to life.

Is there anything specific at the Gatorade booth this year that ATs and AT students should be looking out for? We’re excited to announce that this year we’ve reinstated the Gatorade Secondary School Athletic Trainer Award. This award recognizes a certified AT from each NATA district who has made outstanding contributions in furthering their high school’s athletic care program or the overall profession of secondary school athletic training. We’ll be sharing details about this award at the booth as well during the Secondary School Athletic Training Session at 10:45 in Wabash 1 on Saturday morning. Stop by to learn more!

As a longtime participant at the NATA convention, what does Gatorade enjoy or look forward to most about this annual event? There are so many elements of NATA that we enjoy. Whether it’s attending cutting-edge sessions, celebrating the achievements of outstanding athletic trainers or sharing our latest innovations with this influential audience, the NATA convention is a cornerstone event for us every year. However, for us, the best part is connecting with old friends and meeting some of the up-and-coming athletic trainers. As I’ve mentioned, we know athletic trainers have the inside scoop on athletes’ health and safety needs, so having a chance to connect with some of the best athletic trainers in the business is a valuable opportunity.

Complete the sentence: “Athletic trainers are …… at the forefront of sports medicine and play a critical role on every athletic staff (including in the secondary school setting).”
Congratulations on your induction into the 2014 NATA Hall of Fame.

Meet and Greet
Dr. David Draper

WIU alumni, former preceptors, faculty and staff are invited to join us for light appetizers and a cash bar. Please bring a business card for updating our alumni directory.

MEET YOUR 2014 NATA PRESIDENTIAL CANDIDATES
(Continued from page 1)

RUSSELL J. RICHARDSON, EdD, ATC:
Richardson says a hallmark of a vibrant, health care profession is its commitment towards continuous academic development for all of its constituents. “In my current role as the Executive Committee for Education chair I was able to direct complex, and sometimes controversial discussions leading to the implementation of strategic initiatives that had previously only been talked about,” he says. “As a practicing clinician, and former academician, I have experienced firsthand the complexities of each entity and have worked to bridge the gap between the two.”

Richardson says he hears two common themes from members: “We need more job opportunities, and we need improved compensation.” One of the strategies he believes will move ATs towards better job opportunities includes equipping our members to advocate for their compensation through the medical model. “We are currently working on a plan to identify resources and provide examples of this strategy to make available to our membership early next year,” he says.

Finally, Richardson wants to further develop the association’s position as a leader in youth sports safety and other issues related to concussion in sport. He knows NATA members can help make a difference and wants to empower ATs across the country to get involved. “I have been rewarded many times over as I have witnessed our members be successful not only in patient care, but legislative issues, complex leadership issues, litigations and more.”

SCOTT R. SAILOR, EdD, ATC:
Sailor points to the importance of engaging and maintaining serious dialog with long-standing allies about issues such as appropriate models of supervision for ATs, rules changes and growing demands on student-athletes and athletic training staffs. “It is imperative, as we move forward, that we [strategic allies] work together to bring about positive change for this profession which will result in improved outcomes for our various stakeholders.”
Hot Product Pavilion

The Hot Product Pavilion is a must-see destination at the NATA convention. Located right outside the AT Expo (Hall J) in Crossroads Corridor, the HPP is a great place to see the latest sports medicine products at your own pace. Our Hot Product Pavilion is bigger and better than ever in 2014, so make sure to stop by to learn about the following innovative products:

**2nd Skull®, LLC - Booth 1731**
2nd Skull® is a protective headgear company with patented technology proven to add up to 35 percent more impact protection. 2nd Skull® CAP is for helmet-requiring sports like football or hockey. 2nd Skull BAND is for non-helmet sports like soccer. 2nd Skull® products are proudly made in the USA.

**Adhesion Biomedical, LLC - Booth 555**
SurgiSeal™ Topical Skin Adhesive can replace sutures for incision or laceration repair to get your athletes back on the field faster. It is designed to save time during wound repair; provide a flexible, water-resistant, antimicrobial protective coating; and to eliminate the need for sutures.

**Agency For Student Health Research - Booth 445**
InjureFree
This is the only protective sports safety is NOW! InjureFree connects all caregivers in your community with real-time injury reporting and alerts. Both HPPA and FERPA compliant, InjureFree offers athletic trainers mobile app reporting and follow-up treatment updates while reducing administrative burden. Join the InjureFree network today! www.injureresfata.com

**Air Brit, LLC - Booth 207**
Air Brit Air Suspension Knee Brace
The Air Suspension Knee Brace is a one-of-a-kind knee brace that offers unparalleled comfort while providing the amount of support that YOU decide is needed! Whether you are an active athlete or just in need of additional support to relieve pain, our unique Air Suspension Technology allows you to maintain true mobility, versatility and flexibility without compromising support and comfort. Why not take control of your health by harnessing the power of air… Air Brit Air Brace™

**Alert Services, Inc. - Booth 913**
Squash Cheeks 100% Natural Body & Foot Powder
This is not just a personal care product, but one that energizes your lifestyle! This is a 100 percent all-natural, high-performance body and foot powder that is talc free and features soothing and energizing essential oils. For 10 years running, it’s the best formula available for chafing prevention, sweat reduction and odor elimination.

**Alert Services, Inc. - Booth 913**
Alert ProCut Non-Stick Scissors
The time-tested Alert ProCut Scissors are now available with an upgrade. These scissors have a non-stick coating that withstands adhesive buildup and cleans much easier than chrome coated scissors. You will find these non-stick coated scissors work great on Kinesio tape and Elasticon. Available in Booth 913 for $25 (show special only).

**All-Star Sporting Goods - Booth 544**
CryoHelmet
A new treatment for concussions, migraines, performance/recovery and more. Trauma accumulates over time from repeated impacts during practices and games. The CryoHelmet uses cold therapy to treat some of the inflammation that occurs with these injuries. Therapeutic hypothermia is a rapidly growing field in medicine. For the most up-to-date research, please visit www.iceyourhead.com.

**Ari-Med/Diversa Products Group - Booth 1013**
A25Si Skatewheel Deluxe Med Bag
Our A25Si Skatewheel Deluxe Med Bag has been resized to fit in an overhead bin. It comes with double lid with instrument sleeves, multiple outer pockets, movable inner dividers, a large bandage kit, skatewheel system and heavy duty retractable handle.

**Asea - Booth 656**
Asea and Renu 28
Asea’s proprietary products are the world’s first and only molecular supplements with stabilized Redox Signaling Molecules that detect and repair cellular damage and accelerate healing. ASEA mobilizes fatty acids for athletes to use as a better fuel source, sparing muscle glycogen. For better performance, endurance and recovery, ASEA and Renu 28 provide the edge you need!

**Bauerfeind USA, Inc - Booth 1155**
Bauerfeind USA, Inc - Booth 1155
genuTrain, Solid Black
The Difference is the KNIT and the FFT. This comfortable support with its compression massage effect helps relieve knee pain and swelling to enhance sports performance. It promotes proprioception, thus heightening sensory awareness in the knee for increased joint stability, control, recovery, relief and confidence to make your best move! Worn by NBA players.

**Biodex - Booth 912**
System 4
The Biodex System 4 is a versatile dynamometer with applications in sports medicine/orthopedics, pediatric medicine, neurorehabilitation and neuromuscular research. Evidence-based clinical protocols combine science with practical application. Used in over 70 countries, by professionals in motor-sports, Olympic training, Navy SEALs, NASA and the Russian cosmonaut program.

**Biodex - Booth 912**
Balance System SD
The Biodex Balance System™ SD improves balance, increases agility and develops muscle tone. Used by thousands for testing and training, vestibular rehabilitation and neurorehabilitation, the Balance System document presumes baseline, evaluates injury risk and helps determine post-injury return-to-activity. Specific training exercises include ROM, weight-shift, dynamic joint and core stabilization.

**Biodex - Booth 912**
Concussion Management
The Biodex Balance System SD quantifies the elements of balance pre- and post-injury, recognizing disturbances that cognitive testing alone could overlook. New System software includes expanded normative data and allows custom CTISB protocols and modified BESS testing of postural stability. Objective reporting mitigates burden of return-to-play decision.

**Biowave - Booth 312**
BiowavePRO Neuromodulation Pain Therapy System
BiowavePRO® is a patented advanced pain therapy system that delivers therapeutic electrical signals through skin into deep tissue blocking the transmission of pain, increasing range of motion, reducing stiffness and muscle spasm for up to 24 hours following a 30-minute treatment. Multiple treatments provide a cumulative benefit. BiowavePRO® is also used during AROM, PROM, exercise and stretching to facilitate rehabilitation. Athletes can move more resistance through a greater range of motion with little pain. BiowavePRO® facilitates motion and manages pain simultaneously. Come see why over 80 percent of NFL teams prefer BiowavePRO®

**Bodysport Superdrink - Booth 232**
BODYSPORT
BODYSMOR is a premium sports drink that provides superior hydration and is loaded with electrolytes, vitamins and coconut water. It is high in potassium, low in sodium and contains nothing artificial. It is available in six great-tasting flavors.

**Breg Inc. - Book 306**
FreeRunner™
The FreeRunner™ knee brace is the premier soft good for patellofemoral support. It combines a proprietary offset hinge for truly dynamic stabilization with the innovative low profile and ultra lightweight Smart-Zone™ compression fabric. The FreeRunner™ delivers support when patients need it most. The difference is dynamic.

**Cardex - Book 436**
ConcoScreen
CardeaScreen is an ECG device designed to accurately identify life-threatening cardiac conditions in athletes. The Bluetooth device transmits electrical signals from the patient to a Windows PC for analysis. Algorithms in-tune with an athletic heart analyze the ECG and identify abnormal conditions associated with cardiac arrest.

**CK Industries of the Big Bend, LLC - Booth 1538**
Hatfield Strap
The Hatfield Strap is an innovative compact stretch device that gives a highly effective stretch of the foot, calf, and hamstring (including the IT Band). One thing that really sets it apart from other stretch devices is the shoulder strap that allows the user to relax while getting an intense stretch.

**Cramer Products - Booth 1300**
Cramer Wet Gear Elite AT
Multipurpose AT kit which features 100 percent waterproof materials and seams as well as waterproof zippers for the ultimate in moisture protection. Kit includes rigid, adjustable dividers and wall supports to protect contents and keep supplies in place. Dividers are removable for versatility. Ideal for keeping supplies and electronics safe from any environment, wet or dry.

**Douglas Pads & Sports, Inc. - Booth 548**
Noggin
The Noggin is the newest product on the market made specifically to reduce impact to the head that causes traumatic brain injuries and long term CTE. It is the first and only skull cap made to be worn underneath a helmet that has proven to REDUCE UP TO 85 PERCENT OF THE IMPACT when worn with a certified safety helmet.

**Dr. Cool - Booth 1746**
Dr. Cool Recovery On-The-Go™ Wrap
Dr. Cool is the first and only product to combine ice and compression in one flexible fabric wrap. The wrap’s patented, chemical-free CooCore cooling fabric has earned the prestigious Hohrstein Institute’s “Innovative Technology” award. Available in three sizes: 3” x 25”, 4” x 50”, 6” x 50”.

**Dynamic Tape (PosturePals) - Booth 455**
Dynamic Tape
Dynamic Tape is highly specialized and designed to contribute genuine mechanical force into the kinetic chain. Working like a bungee cord, the unique, strongly elastic Dynamic Tape aims to absorb load, contribute to force generation, improve biomechanical efficiency and modify faulty movement patterns. Load reduction combined with powerful neurophysiological effects provide prompt pain relief, reduce metabolic demand, facilitate recovery and improve performance.
Gladiator by SGI - Booth 1631
Gladiator High Performance
Using our Power Grip® technology with two layers of 2mm EVA material surrounding a Nano-Shock Barrier, the High Performance is designed to absorb shock while 30 percent thinner than the Gladiator Pro. The ultra-thin Gladiator takes our patent-pending comfort design and provides the athlete with the highest level of comfort and protection possible.

HayZack Sports - Booth 1719
ICE IT
Invented by an athletic trainer, ICE IT is designed to keep water bottles cold through an entire practice or game. And, ICE IT is made to your own grade or Powederade handle and funnel the ice and/or cold water directly into the water bottles. ICE IT can also be used on Cramer, Medco, Academy, Dick's and Champi-on water bottles. ICE IT is now in production and will be ready for the 2014-15 football season.

IBRAMED - Booth 1246
Neurodyn
Complete electrolysis unit capable to generate seven types of currents: TENS, FES, Interferential, Aussie, Russian, Polarized and Microneuro. Pre-programmed treatment protocols. Indicated for: muscular strengthening, increase of the muscular resistance, reduction of muscle spasticity, muscle paralysis, reduction of edema, and pain and inflammation of post-surgery and cutaneous wounds. Neurodyn Aussie (with Aussie current, 1KHz and 4KHz) also available.

ING Source, Inc. - Booth 1739
FS6 Compression Foot Sleeve
The FS6 Compression Foot Sleeve offers medical-grade orthopedic support and graduated compression in a thin, light and comfortable sleeve you can wear under your normal socks. Relieves pain associated with plantar fasciitis, heel spurs and edema.

ING Source, Inc. - Booth 1739
CS6 Compression Calf Sleeve
The CS6 Compression Calf Sleeve offers medical-grade orthopedic support and graduated compression in a thin, light and comfortable alternative to standard compression stockings. Relieves pain associated with poor circulation, Achilles tendinitis, shin splints and cramps.

ING Source, Inc. - Booth 1739
KS6 Compression Knee Sleeve
The KS6 Compression Knee Sleeve promotes good circulation while relieving the pain of runner's knee and related conditions. Relieves pain associated with medical-grade orthopedic support and graduated compression. As effective as bulkier knee braces, but thin, light and comfortable.

ING Source, Inc. - Booth 1739
PS3 Compression Patella Sleeve
The PS3 Compression Patella Sleeve treats patellar tendinitis (jumper's knee) by providing medical-grade orthopedic support for the patella while promoting optimal circulation to promote healing. As effective as bulkier and less comfortable patella straps.

ING Source, Inc. - Booth 1739
ES3 Compression Elbow Sleeve
The ES3 Compression Elbow Sleeve uses Compression Zone Technology™ to relieve the pain of tennis elbow and related conditions. The thin and light sleeve provides medical-grade orthopedic support and promotes healing through efficient circulation.

Innovative Bracing - Booth: 1448
TendonTrak
The TENDON TRAK™ is the only counterfeit device that supports tissue making muscle contraction more efficient rather than inhibiting it. Physical therapist designed and clinically tested. Indications include Lateral and Medial Epicondylitis, Osgood Schlatter's and Sever's Disease, Patellar and Achilles Tendinitis. Utilizes a patented method, latex free and made in the USA.

IntelliSkin - Booth 201
IntelliSkin Posture Apparel
Posture apparel that physically connects with your body to achieve optimal posture support and pain relief. We’ve won 20+ years of elite, front-line sports medicine and wisdom into our clinically-proven PostureCue™ and CoreCue™ technologies to provide both immediate and long-term benefits around posture correction.

iWalk Free, Inc. - Booth 430
iWALK2.0 CRUTCHES ARE OBSOLETE! See the product that has been sweeping the awards at all the medical device trade shows. The all-new iWALK2.0 hands free ends the pain and inconvenience of conventional crutches. Stop crutching and start iWALKing now!

La Pointique Int'l, Ltd - Booth 431
222Z BACK SUPPORT COMPRESSION TOP
Endo2: Men’s Support Series enhances sports performance with the seamless compression design combined with Power System and Comfort System. The Power System of 222Z stabilizes and supports the shoulders and center of the trunk to maximize energy. Comfort System wicks sweat to keep the body dry during long training.

MCDAVID SPORTS - Booth 601
McDavid Pre-Engineered Kinesiology Tech Kits
Our newly released Kinesiology Tech Kits are designed and pre-engineered for easy precise application. These kits cover a number of common athletic injury issues. Kinesiology tape works at a micro level to reduce pain, soreness and swelling, while offering some minor sup-port. McDavid innovates the innovative.

Mueller - Booth 1231
Med Kit™ Omni

Multi Radiance - Booth: 1600
GameDay Laser
“The NIKE Oregon Project has been a successful pioneer in training methods, injury prevention and treatment. We believe that Multi Radiance MR4 Lasers are another inno-vation that will help us continue to be at the top.” —Al- berto Salazar, Head Coach. GameDay ™ - The Affordable Personal Athletic Laser by Multi Radiance.

Natus Medical Inc. - Booth 1247
inVasion – Gaze Stability Assessment
The invVision™ package from NeuroCom® quantifies a patient’s ability to maintain visual acuity and stable gaze while actively moving the head. The Dynamic Visual Acuity (DVA) test quantifies the impact of vestibular ocular reflex (VOR) system impairment on a patient’s ability to perceive objects accurately while moving the head at a given velocity on a given axis. While the Gaze Stabilization Test (GST) quantifies the range of head movement velocities on a given axis over which a patient is able to maintain an acceptable level of visual acuity.

NormaTec - Booth 1531
NormaTec Recovery Systems
Speed healing, reduce muscle soreness and perform at your best. NormaTec’s patented Recovery Systems are designed and assembled in the USA with quali-ty components, and are 30 percent lighter than last year’s models. Our portable, durable and world voltage capable systems minimize swelling and improve circulation. NormaTec, Created by Scientists, Perfected by Athletes®.

Ossur Americas - Booth 921
CTP Custom
The CTP Ligament Brace, recognized as the “athlete’s choice” for many high contact sports, is the only truly custom brace on the market. Based on a Total Support System, the rigid carbon fiber frame “locks” onto the tibia, providing brace-to-bone contact needed for maxi-mum stabilization of the knee joint.

Ossur Americas - Booth 921
Unloader One® Custom
The Unloader One® is a clinically proven treatment for mild to severe unicompartmental osteoarthritis (OA) of the knee and its associated pain. Its comfortable, light-weight and low-profile design provides pain relief using a 3-Point Leverage System. The Unloader One® is a proven choice for treating knee conditions requiring load reduction.

OTC Nutrition LLC - Booth 357
CALSURA Fast Action Drink Tablet
CALSURA Fast Action Drink Tablet provides a highly absorbable form of calcium shown to build stronger bones and reduce stress fracture risk. Simply add to water for a fun, convenient way to get 50 percent of the daily recommended requirements for calcium and vitamin D, plus vitamin C, iron and magnesium.

Perfect Pitch - Booth 654
The Rope Perfect Pitch
Designed for baseball and softball athletes, improving throwing confidence, velocity and accuracy from improp-er throwing mechanisms. Utilized by major league baseball teams and rehab/therapy professionals country-wide, the tackle, auditory and physical feedback allows athletes to adjust pitching and throwing techniques preventing depre-vention of bad habits resulting in fatigue and/or injury.

PHL Products - Booth 403
PLH Infrared
For 35 years PLH Products, Inc. has proudly served as the benchmark in the infrared sauna industry. By innovating with the latest technology and the highest standards of quality, PLH Products manufactures infrared products that are used by professional athletes, athletic trainers and AT facilities across the country.

PowerPlay - Booth 402
PowerPlay Pro Pack
PowerPlay™ is the most portable, affordable cold and compression therapy system available. The compact device has three ports offering cold and intermittent, sequential compression to reduce pain and swelling, allowing athletes to get back in the game faster. The PowerPlay Pro Pack includes two pumps, two insulated bags, two extender tubes, one of each joint wrap and an additional gel pack for each wrap.

PreventMed Technologies - Booth 319
Heat Stress Safety Kit and Infinity Line by [x]temp
The [x]temp Heat Stress Safety Kit is an emergency first response for serious incidents of heat stress. Be prepared to respond and protect your student athletes. Our Infinity line products have limitations applicable for safe, simple and rapid cooling. Combining Solo, Duo and Vier cooling packs with strap sets, the [x]temp Infinity line of products are multifunctional and ideal for rehab or injury recovery.

Q2O LLC - CrampX - Booth 401
CrampX
Q2O CrampX is flavored water you drink for muscle cramps and muscle soreness. CrampX is a supplement to hydrating and thinning quality beverages. Drink CrampX to prevent, relieve a muscle cramp and muscle soreness. Designed for baseball and softball athletes, improving throwing confidence, velocity and accuracy from improper throwing mechanisms. Utilized by major league baseball teams and rehab/therapy professionals country-wide, the tackle, auditory and physical feedback allows athletes to adjust pitching and throwing techniques preventing development of bad habits resulting in fatigue and/or injury.

EC3D Compression
EC3D is part of QSD, Inc., a manufacturer of medical compression and sports compression. EC3D stands for ENGINEERED COMPRESSION 3 DIMENSIONAL. EC3D incorporates kinesiology zones into all products, supporting muscle stabilization, increased performance and endurance, increased proprioception and postural alignment. Zones are reversed, which makes the recovery process shorter and more effective. Come by our
Hot Product Pavilion (Continued from page 9)

booth to get a pair of socks so you can experience the difference of EC3D Compression (limited quantities available).

Rapid Performance Products - Booth 556
Red Whey
Red Whey utilizes the natural benefits of Tart Cherry Juice and Whey Protein Isolate to create an all natural muscle recovery drink that promotes muscle repair and development. With 12g of Whey Protein Isolate in an 8oz serving, athletes get a high level of branch chain amino acids that can only be obtained through diet. Red Whey is formulated to follow NCAA guidelines and certified by Informed Choice for Sport.

RICA Surgical Products, Inc - Booth 1605
NICE ICE® CryoRoller
NICE ICE® CryoRoller is a combination of three effective treatment modalities (ice, compression and massage) all in one clean and easy-to-use product. GREAT TURNOUT FOR PRE-CONFERENCE WORKSHOPS

By Sanette Ludick

More than 150 athletic trainers came to the convention a day early to attend this year’s Career Workshops, held from 8 a.m. to 5 p.m. on June 25. The workshops are designed to provide ATs with educational and career information, as well as hands-on training. Sessions included: Business of Athletic Training, the Athletic Trainer as a Physician Extender; Occupational Health and Public Safety; Measuring and Establishing Value: Research Concepts Roundtable; and Creating Creative Opportunities in Performance Arts. Following a morning lecture, the groups split up into breakout sessions, including a hands-on lab where attendees interested in the physician extender role learned about casting, radiography and suturing/knot tying.

“The most exciting part of the workshops are learning new skills that we can apply in the workplace,” said COPA District Eight Representative Wendy Levanway, who organized the Creating Creative Opportunities in Performance Arts event. NATA’s External Marketing Coordinator and Staff Liaison to the Committee on Practice Advancement (COPA), Amanda Muscatell said this year’s workshops focused on topics and concerns ATs have had over the past year.

Victoria Kramp, ATC, from Yardley, Pennsylvania, wanted to learn more about the duties and responsibilities of an AT Physician Extender. She attended the introductory session intended for ATs with little or no prior experience as a physician extender, or those interested in learning about the role. Kramp said she was especially looking forward to the casting breakout session, which presents ATs with the opportunity to practice and strengthen casting skills.
Designed for students who are certified Athletic Trainers, the degree is a 33-hour, Post-Professional athletic training degree which provides graduate students with the knowledge and clinical education to enhance their practice as certified athletic trainers.

Primarily delivered online, but with a single two week on-campus intensive instruction session in Marion, Indiana.
